Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 33-36 are rejected under 35 U.S.C. 102(b) as being anticipated by MILNE et al. (5,680,639).

As per claim 33, Milne teaches the claimed "method" comprising: "declaratively composing a time-based media sequence from a first media sequence and a second media sequence" (Milne, column 19, lines 10-14; animation multimedia objects 3630 and 3640), and "initiating the second media sequence at a variable time relative to the first media sequence" (Milne, column 7, lines 36-60; column 17, lines 42-65; the serially playbacks of multimedia graphic clip objects in which the start of subsequent clip depends on the play source clock of its precedent clip object) "wherein the variable time depends on a play rate of the first media sequence" (Milne, column 7, lines 14-48; column 11, lines 5-55; the time source synchronization allows the play source clock (or play rate) to match with current clock (or duration time on current clock)).

Claim 34 adds into claim 33 "varying the play rate of the first media sequence" (Milne, column 7, lines 36-48; the variable clocks according to the playback rate).

Claim 35 adds into claim 33 "changing a play rate of the second media sequence" (Milne, column 7, lines 36-48, column 17, lines 22-65; the variable clocks according to the playback rates for all (emphasize added) graphic clip objects).

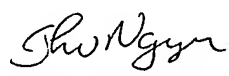

Claim 36 adds into claim 33 "adjusting the variable time based on a play rate of the second media sequence" " (Milne, column 7, lines 14-48; column 11, lines 5-55; the time source synchronization allows the play source clock (or play rate) of all (emphasize added) graphic clip objects to match with current clock (or duration time)).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phu K. Nguyen whose telephone number is (571) 272 7645. The examiner can normally be reached on M-F 8:00-4:30.
